About CPPP

Central Public Procurement Portal

In pursuance of the recommendations of the Committee on Public Procurement headed by Shri Vinod Dhall and the decisions thereon of the Group of Ministers constituted to consider measures to tackle corruption and ensure transparency, the Department of Expenditure has taken action for setting up a Central Public Procurement Portal (CPP Portal). National Informatics Centre (NIC) has been given the responsibility for setting up this portal.

The primary objective of the portal is to provide a single point access to the information on procurements made across various Ministries and the line Departments. The CPP Portal is accessible at the URL http://eprocure.gov.in and it has e-publishing and e-procurement modules. It is mandatory for all Ministries/ Departments of the Central Government, Central Public Sector Enterprises (CPSEs) and Autonomous and Statutory Bodies to publish all their tender enquiries in the CPPP portal.

FAQ

FAQ

National Informatics Centre (NIC), Ministry of Electronics & Information Technology, after having developed a generic software "Government eProcurement system of NIC (GePNIC ©) has" in close association with **Procurement Policy Division, Ministry of Finance** developed, hosted and implemented the Central Public Procurement Portal customized to cater to the electronic procurement/ tendering requirements of the Central Government departments and other organizations.

The system is made available as a platform and can easily be adopted for all kinds of procurement such as Goods, Services & Works. It aims at transparency and non-discrimination amongst bidders, by allowing free access to tender documents, clarifications, secure on line bid submission and access to bid opening event to all, from any place on 24X7 basis, using the system through Internet, in a faster, and secure environment adopting industry standard open technologies.

Variety of procurement requirements of varied procuring entities has been built in a robust configurable , workflow based manner.

This can be configured for use by an organization at it's apex level, and at multiple subordinate levels, at which tenders could independently be floated.

Strong in-built security features including two-factor Authentication with Digital Signature Certificates (DSCs) for foreign nationals also as per IT Act, Usage of SSL, Role-based User Access and Bid-encryption at Client end, using PKI technologies. Security audited by as per EPS guidelines by STQC.

User base across the country by 27 State / Union Territories of India and by around 400 Central Govt. entities. Processed 3.09 Million electronic tenders worth over Rs. 46.83 lakh Crores have been processed successfully till 31st March 2018.

Purpose & Audience

This annual report on Central Public Procurement Portal (CPPP) based on the usage in the year 2017-18. The target audience would be all users of CPP Portal and purpose of the report is to showcase achievements of electronic procurement through CPP Portal across the country by various Central procuring entities, Autonomous Body and Public Sector Unit(s). The Annual reports provide information on statistical reports and history and summarize the State's statistics in the past year. Annual report highlights the achievement of user who have been very supportive and shown tremendous performance as procuring entities.

This report will indicate the importance of electronic procurement system and in this emerging market place Central Public Procurement Portal catering a platform to bring transparency and reliability in procurement process. Through this document the provided information will provide insight of features and security of CPP Portal where the bid will not get tampered by any means possible, bidding document will be available with the respective vendor in tenders, RTI vigilance will get minimized and this portal also promotes open competition with free registration for bidders

Mission:

Develop a secure and reliable end-to-end technological model to ensure not only fair, transparent and cost effective procurement processes, but also develop, maintain and continuously update a data analytics platform needed to support strategic decisions towards public expenditure reduction and optimization

It is believed that implementation of this will allow it to pursue its mission along three key strategic dimensions:

Key issue:

Need of integration of information across various Procurement Giants .

Need of Standardization for monitoring performance Indicators.
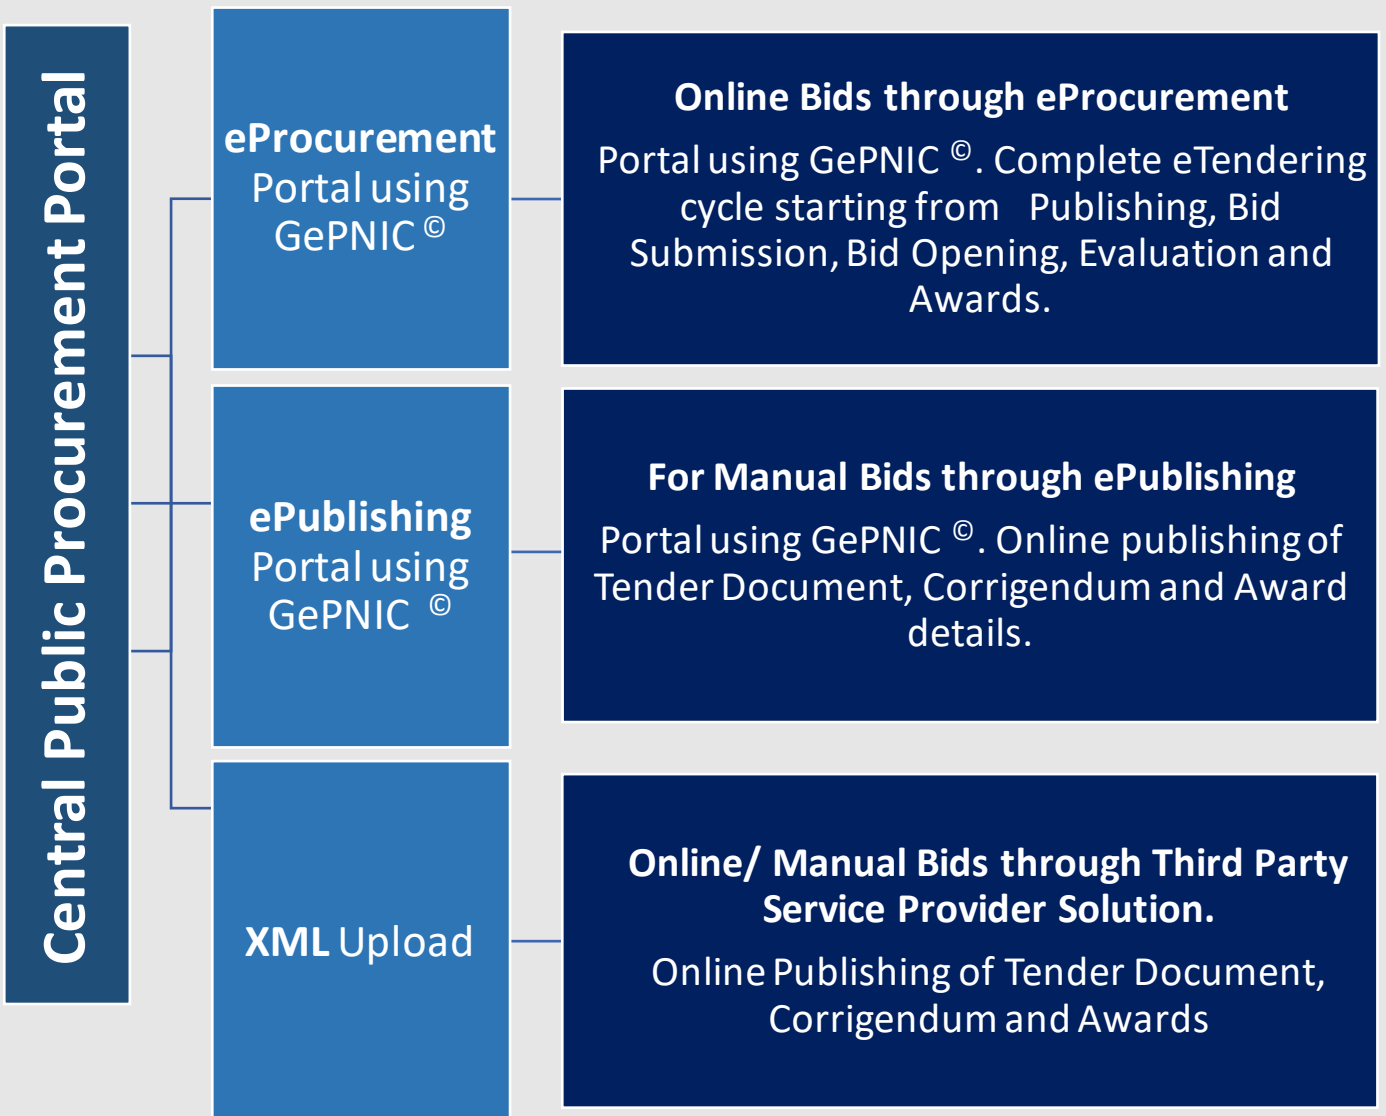

Financial	Political	Social
• To assess the quantum of saving after moving to electronic platform	• Through completely transparent, rigorous and efficient procurement processes	• Providing a better service for all stakeholders, achieving their buy-in and contribution, alongside a fundamental cultural change in the Public Administration

Central Public Procurement Portal
(Assimilation of all tenders across the country)

One stop shop for all activities for all GOI Policies/ Standards/ Guidelines / Orders, etc. on public procurement.

Mandatory for all Ministries/ Department of the Central Government, their attached and subordinate offices, Central Public Sector Enterprises (CPSEs) and autonomous/ statutory bodies to make their tenders enquires available in Central public procurement Portal. Various methodology of same is as follows :

Central Public Procurement Portal

eProcurement Portal using GePNIC $^{©}$

Online Bids through eProcurement
Portal using GePNIC $^{©}$. Complete eTendering cycle starting from   Publishing, Bid Submission, Bid Opening, Evaluation and Awards.

ePublishing Portal using GePNIC $^{©}$

For Manual Bids through ePublishing
Portal using GePNIC $^{©}$. Online publishing of Tender Document, Corrigendum and Award details.

XML Upload

Online/ Manual Bids through Third Party Service Provider Solution.
Online Publishing of Tender Document, Corrigendum and Awards

Journey so Far

Central Public Procurement Portal was made operational on 1st Jan 2012 by providing a two phased model for seamlessly brining in all Central Government entities into electornic procurement ambit. ePublishing and eProcuement

By issuing various guidelines and with constant monitoring, Procurement Policy Division, Department of Expenditure has successfully on boarded majority of Central government procuring entities on to the portal.

Multiple channels of Capacity Building, Easy availability of Digital Signature Certificates, Process re engineering as per need, inculcating the adoption of Best Practises across organisation, availability of uniform platform for easy of use and quick adoption in case of interdepartmental transfers etc were the steps taken which resulted in multifold increase growth over the last few years across the country.

Fin Year	Electronic Tenders	Value of Tenders (In Cr.)	% Increase over previous year	Average tenders in a Month
2017-18	11,11,230	19,58,787.38	62.94%	92,603
2016-17	6,81,971	8,90,968.84	32.72%	56,831
2015-16	5,13,842	6,92,177.78	66.37%	42,820
2014-15	3,08,854	4,77,517.24	39.98%	25,737

* Data comprise of eTenders processed through NIC system, GePNIC in CPP portal as well as 27 States/UT's.

Benefits to Buyers

- Uniform and standardized tendering process across the department
- Reduction in Procurement cycle time
- Reduction of Tender publishing costs
- Safe, Secured Platform
- Procurement Processes Efficiency
- Automated milestone based alerts
- Multiple bid-formats
- Wide publicity
- Discourages Cartel formation
- Real Time 24 x 7 availability of information
- Improved Accountability
- Automated milestone based mail / SMS alerts and status updates
- Centralized portal where in procurement related information of all Central Govt. entities are available
- Visibility of Contract awarded with L1 rates
- Extensive search on various Product categories and other parameters.
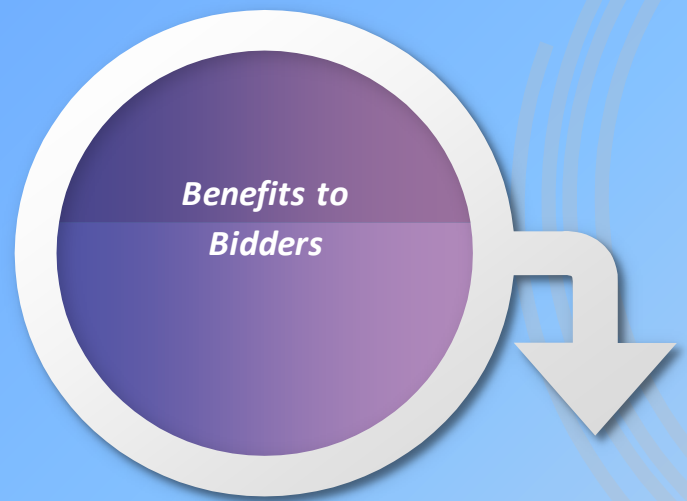

Benefits to Bidders

- Zero Cost to Bidders, No Per-Bid Charges or registration charges.
- Eliminates the need to submit bulky and multiple bid copies in paper form.
- Anytime & Anywhere Bidding, No physical threat
- Fair, Free and Fearless participation
- Provision to modify , re-submit and withdrawal the bid documents till bid closing time.
- Increased visibility: all tender information available at one place on line.
- Cuts down unnecessary physical trips to office of tender inviting authority.
- Transparent system inspiring confidence among bidder community.

Stakeholders

In eProcurement System/ Organizational Set-up

Stakeholder identification

Stakeholders for e–procurement can include any person or functional area that "touches" the systems, tools or information being held. This may include people at all levels of the organisation and external contacts such as suppliers and outsourcing partners. An agency can have multiple procurement processes. It may be necessary to look across the entire agency for the appropriate stakeholders and to understand the different business rules as they apply to e–procurement.

The following list provides a general view of functional procurement areas and their potential e–procurement-related activities

Functional Procurement Areas and Their Activities	
Accounts Payable	Maintins catalogues; Process POs; Process invoices
Audit	Ensure laws, rules, procedures & guidelines are being followed
Buyers	Initiate requisitions; Access catalogues; Approve POs; Receipt purchases; Process invoices; Approve payments
Executive	Sponsor Champions program; Develops policy; Secures funds and resources; Supports policy and procedural changes across functional areas
Finance	Manage, analyse and access data; Develop & implement policy and procurement processes
IT	Implement, integrate & manage online systems and tools; Develop business & IT strategy; Develop & implement policy
Legal	Write & negotiate contracts
Procurement	Manage, analyse and access data; Source suppliers; Manage categories & contracts; Manage suppliers; Develop & implement policy; Receipt purchases; Approve payments
Security	Develop & maintain security controls and requirements; Develop & implement policy
Suppliers	Respond to tenders; Participate in contract management; Maintain catalogues; Process POs; Submit invoices; Receive payment

Managing stakeholders

When managing suppliers, it is important to demonstrate the benefits of e–procurement as their engagement is critical to success. Communicate what e–procurement can and cannot do followed–up with regular progress reporting and quantifiable metrics. These messages, form part of a strong Communications Plan and will help to keep key stakeholders informed and manage their expectations.

Getting stakeholders to participate can be difficult, especially if they do not understand the value of the implementation to themselves and their functional area. A successful model includes a cross–functional team with members from each functional area (see list detailed in Stakeholder Identification). The team can support testing, development and training activities along with acting as product champions.

Here are some examples of how well–managed stakeholders at different levels in the organisation can positively impact an e–procurement implementation:

— Key stakeholders can spear head the change management activities by reviewing and updating local policy and procedures that will be impacted by the implementation

— The Executive Sponsor can ensure new policies and procedures are put into place to drive uptake of e-procurement

— End users prefer a fast and easy procurement process. Their roles and responsibilities often change as a result of e–procurement. Changes should be identified and communicated in a way that allows them to absorb the information and incorporate it into their work processes

List of Services

- Availability of complete tender details in public domain under the tender status link of the portal
- Comprehensive search criteria with various parameters
- Tender information of all Central Government procuring entities in a single platform
- Dashboard with prominent KPIs indicating trends of time , cost, competition, reach
- Utmost secrecy and integrity of the bids submitted using PKI Encryption . Manual system was not fool proof and subject to Individuals safekeeping methods.
- Wide number of search criteria
- Drill down MIS reports on login
- Event alert mechanisms via emails, SMS and mobile app.
- Vendor Debarment information
- Annual audits as per EPS guidelines
- Continuous Capacity Building mechanisms
- MDP on Procurement at NIFM
- Online, Daily Web learning sessions
- Customised class room training at user premises
- NICSI empanelled vendors available for training and roll out
- CPPP cater Call Centre Service 24x7 Helpdesk support and dedicated email support

Other Salient Features Introduced

Tender cum Auction - eRA

Tender Cum Auction is a combination of Tender Followed by Auction (Reverse / Forward Auction). This is normally used to avoid price negotiation with only L1 bidder. It is also used as a tool for Price discovery as System offers greater insights into the current market pricing.

Procuring entity has reserves the right to go for Reverse Auction process or may finalize the tender without Reverse Auction, if required. Procuring entity has to specify in the tender about the intent to go for Reverse/Forward Auction amongst technically qualified bidders after Opening of Financial Bids. In this process, the participating bidders get an opportunity to reduce their prices online in a transparent and fair manner based on the evaluation methodology stipulated in Tender Document without the identity of the bidder being disclosed to either to other bidders or to procuring entity. It allows bidders multiple opportunities to offer a price. There will be no participations fees for auction.

Tender Cum Auction (FY 2017-18)
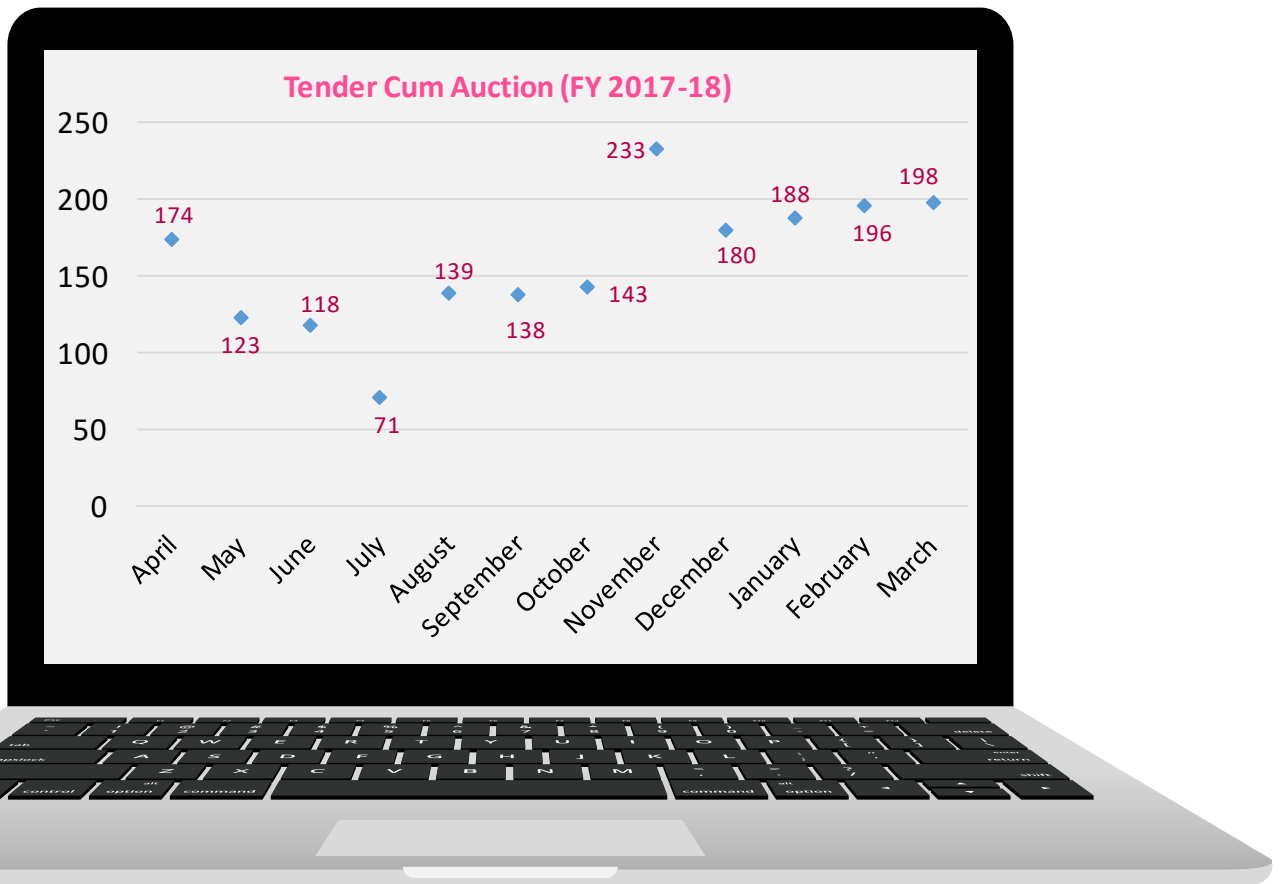

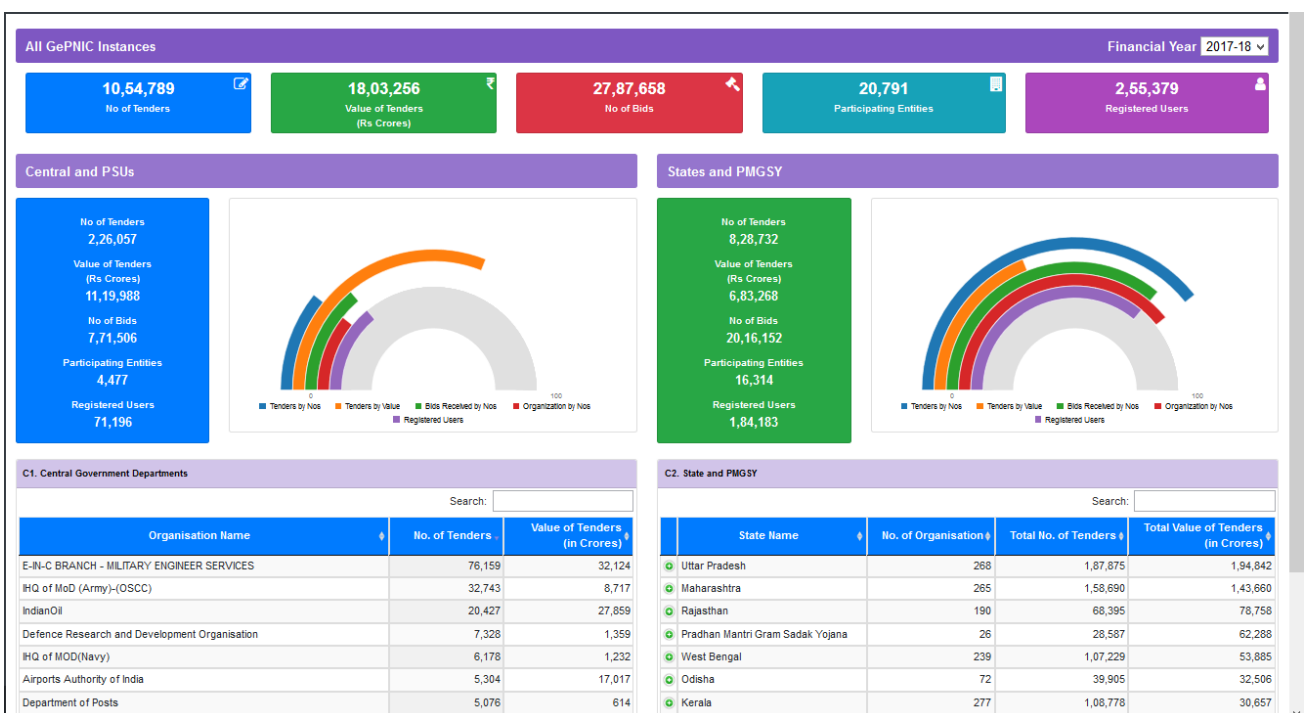

As we have seen that eProcurement is used across the country by State and Central Governments. GePNIC system cater to around 75% of country's electronic procurement needs. So far we had varied MIS reports to understand the performance, show case the major savings of time / cost benefits.

In this year a dashboard has been put up in CPP Portal which contains a snapshot and summary of key information about the transactions in visual form that enables one to get an instant impression on the performance. Once can assess the various KPIs, which provides various insights into the procurement at a glance. Based on the feedback received more and more KPIs are being built.

Security & Authentication Involved

Secured Hosting & Data Security

—   Hosted at NDCSP ,New Delhi which has ISO 27001 Certification

—   Log Shipping as per NIC Policy.

—   Replication of data & backup facility.

—   Web security- SSL technology.

—   Bid are Encrypted at Client system and stored in the server.

—   Audit trail of each activity.

Authenticity

—   Two factor authentication with Digital Signatures.

—   Digital Signing of all documents.

—   Role based access system.

STQC Audited

—   Security audited by Standardization Testing & Quality certification (STQC) for compliance to Quality requirements of eProcurement Systems and various other CERT-IN agencies

Other Features

—   Mail/ SMS for various events.

—   MIS report for generating reports online.

—   Dedicated Team for monitoring and managing Hardware's and Application.

Bidders agreed strongly that The transparency of the System has increased and has Resulted in better participation

Bidder agreed that the bid Information is kept confidential and secrecy is maintained till bid opening

Bidder agreed to the statement That online procurement resulted in Time Saving and Cost associated With the activities.

Strongly supported the view that Minimum IT expertise is required and also the dependency on procuring entities is much reduced.

Participants fully agreed that

(1) Online Bid resubmission has helped to handle last minute bid updation in the bid documents.
(2) Bid Submitted are safely encrypted and stored.
(3) Automated alerts helps in proper follow-up.

User agreed that it is easy to fill the BoQ, process is simple and user friendly and the portal registration process is much simpler.

Bidder feel that their queries are replied properly by the helpdesk team

- The survey was conducted for 12 days

- Total No. of Bidder's participated in survey were 2,703 in count

■ Very Good   ■ Good   ■ Average/Poor

Conclusion

It is a constant endeavour by Procurement Policy Division and National Informatics Centre to keep continuously improving the CPP portal. We get lot of encouragement from our users in the form of valuable feedback / suggestions / request for new features etc.

We try to live up to the expectations and have enhanced CPPP with following additions in this year :

- Setting up of a dedicated eProcurement portal for Ministry of Defence- defproc.gov.in
- Grievance Capturing Module used by DIPP, MSME
- Vendor Debarment Display
- Verification of UAN for MSE Bidders from Sambandh portal
- Unified Dash board with KPIs for all instances of GePNIC
- Module for Post Tendering Works and Services
- Mobile app vendors & TIAs
- Auto population of participating Bidder details after Bid opening
- Interfacing with GeM, enabling GeM undertaking
- First National Workshop on CPPP conducted with Best Performance Awards to select organisations

"Central Public Procurement Portal is a robust and secured platform offering full transparency and accountability in public procurement for the Government of India, most State and local Governments across India. CPPP is a trusted tool for vendors and public servants, besides being a valuable data source for procurement performance analytics."

Sh Kalyana Rajaraman, IAS
JS-PFC-II, Department of Expenditure
(June 2017 to Jul 2018)

Awards and Accolades

Three prestigious awards in the year :

GEMS of Digital India   CSI Nihilent Award

South Asian Procurement Innovation Award By World Bank

Annexures

Functions and features of e-procurement system of NIC

Government eProcurement System of NIC(GePNIC ©)		
Major Functions/Features of GePNIC ©		
Modules	**GePNIC ©**	**Remarks**
